Re: *Explanation of the over 10% in profit
after tax in the Q3/2026 financial statement
compared to Q3/2025.*

Ha Noi, October 19, 2026

To: **The State Securities Commission**

The Hanoi Stock Exchange

The Company's profit after tax in Q3/2026 reached VND 7,9 billion, down 19% (equivalent to VND 1,85 billion) compared to Q3/2025, for the following reasons:

- Sales volume in Q3/2026 decreased by 20% compared to the same period.
- Raw zinc prices fluctuated sharply, increasing by more than 20% compared to the same period.
- From April 1, 2026, the Company increased the selling prices of domestic battery by 10%; at the same time, during the period, the Company also expanded its processing of auxiliary materials for partners.

The above factors are the main reasons for the change of over 10% in profit after tax in Q3/2026 compared to the same period in 2025.

Sincerely.
